

# INSTRUCTION MANUAL

## I. Installation Notice

1. Install water supply lines in accordance with this manual.
2. Floor drain should be installed in the location of the faucet.
3. Install faucets only after the completion of house interior decoration in case paint or other chemicals erode faucet surface.
4. Clean pipes before installation to get rid of mud, sand or other debris.
5. If the thread of pipes don't match well with product, please find out the reason first, otherwise a forced connection will damage the faucet.
6. After installation, check all the joints to make sure they are firmly connected. Then turn on and off water repeatedly to ensure there is no leakage around the joints. At this stage, the product is ready for normal use.
7. Keep the manual to the user.

## II. Operation Notice

1. The working condition of this product is water pressure 0.05~1.0MPa, water temperature 4~90°C.
2. Do not hang heavy things on the faucet.
3. Make sure the faucet is off when no water comes out of it (especially when nobody resides in or during the period of decoration or suspend of water).
4. Regularly clean the surface of faucet to keep it bright. Attention: do not use inappropriate tools such as sharp brushes, rough sponges, scouring pads or corrosive detergent to clean the faucet, and we do not recommend that you use the detergent sold in the market, because its formula is changing frequently. Please clean the faucet by a wet cotton cloth with soapy water, then rinse and dry with a soft cotton cloth after each time of usage.
5. When the room temperature drops to below 0°C, take necessary measures (such as keeping faucet warm and closing windows) to prevent the faucet from being frozen or even broken (especially when windows kept open for air ventilation while nobody resides in).
6. Please open the cold and hot water in turn and adjust to comfortable temperature before washing to avoid scald.
7. Do not disassemble the product to avoid any damage.

## ■ Installation Diagram

\* The installation diagram is only for reference, the product is subject to the real object.

## ■ Installation Steps

1. As shown in figure, connect braided hoses and threaded rod to faucet body tightly (**Note: position as red braided hose on the left and blue braided hose on the right**), slide lift handle into the slot at the back of faucet body and connect with lift rod.
2. Pass faucet body with gasket through hole of basin counter, pad rubber washer and locking washer in turn, tighten with hex coupling nut.
3. Install drainage set and connect with lift rod.
4. Connect braided hoses with triangle valves. **Note: position as hot left and cold right.**
5. Run water to check if the installation is qualified.
